PHASE 7 / 01

Latency across all formal requests

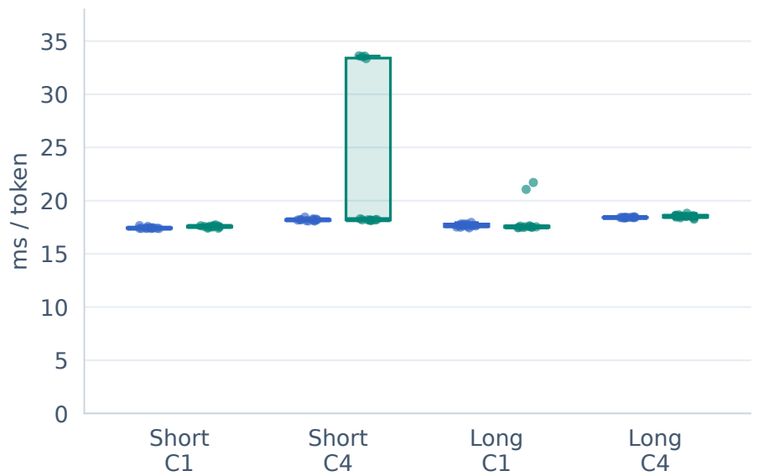

192 requests | 12 per mode, workload, concurrency and turn | All requests succeeded

PD Static PPD

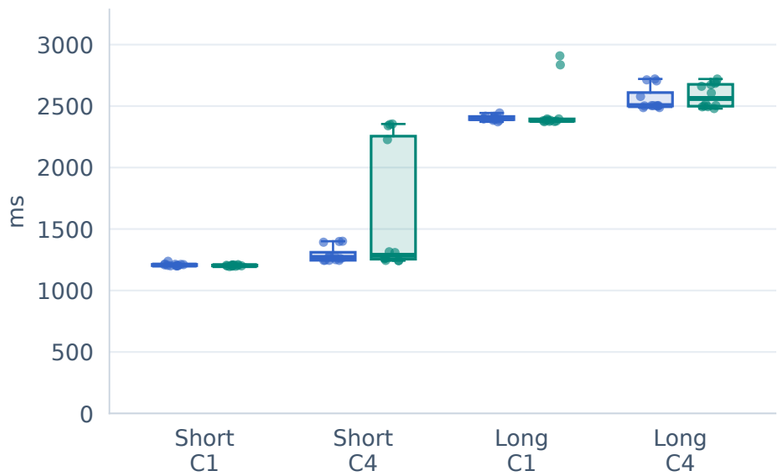

Turn 1 / TTFT

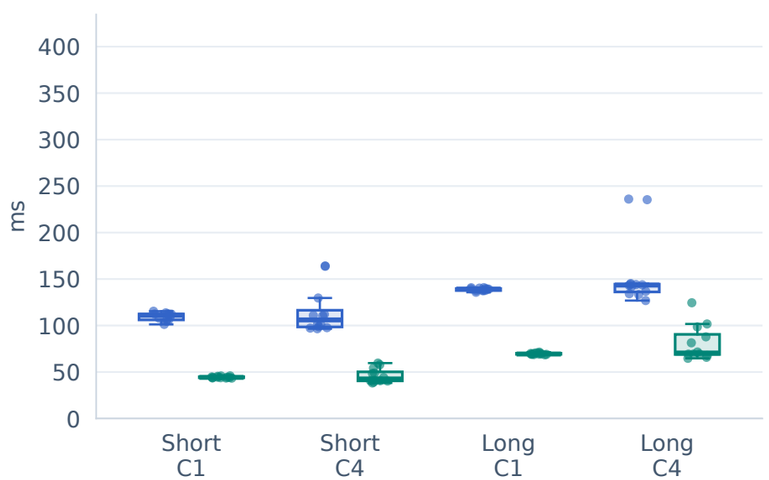

Turn 1 / TPOT

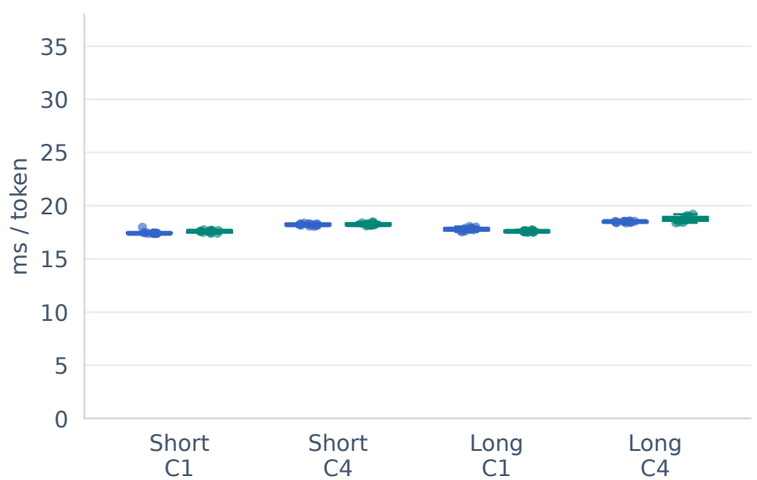

Turn 1 / End-to-end latency

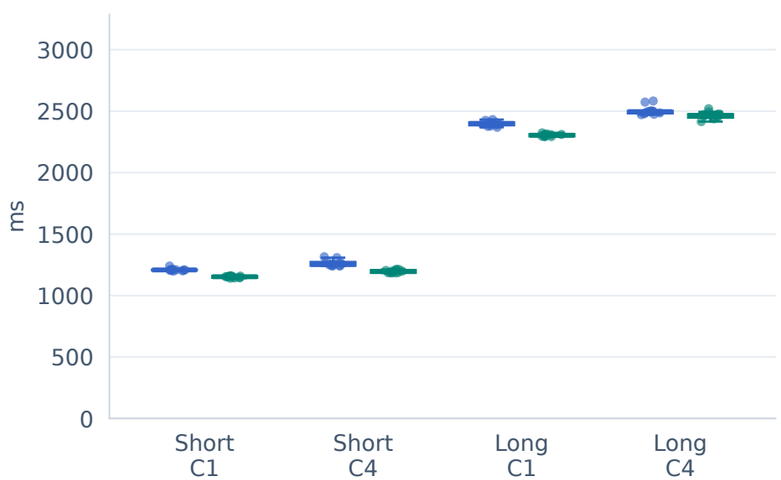

Turn 2 / TTFT

Turn 2 / TPOT

Turn 2 / End-to-end latency

2 x RTX 4090 | Qwen2.5-7B-Instruct | 100Gbps RoCE, host staging | Dynamic routing disabled

Dots: every request. Boxes: median and IQR; whiskers: 1.5 x IQR. All points, including outliers, remain visible. C = concurrent conversations.

Source: all-requests.csv. Warmup/smoke excluded. Turn 2 histories can differ across modes; this figure uses all requests, not a matched subset.
