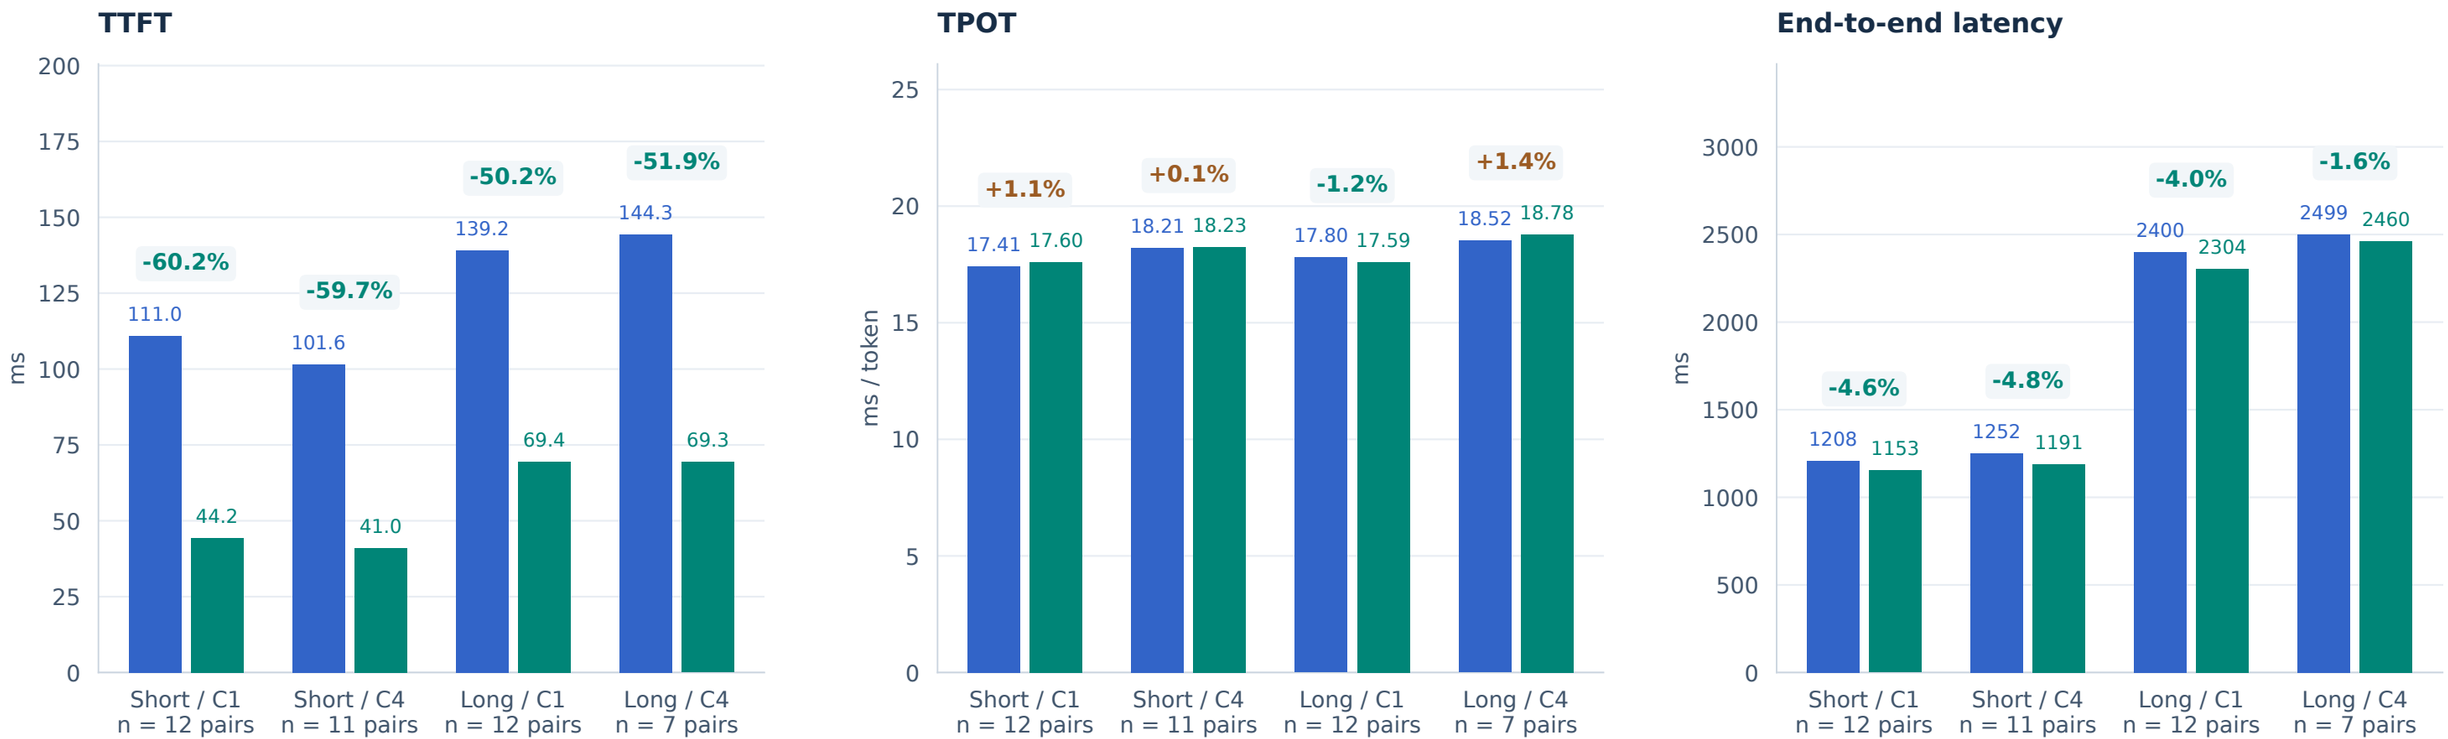
PHASE 7 / 02

Turn 2 with identical request payloads

PD vs static PPD | 42 matched pairs | Bars show group medians; lower latency is better



2 x RTX 4090 | Qwen2.5-7B-Instruct | 100Gbps RoCE, host staging | Dynamic routing disabled
Badges: relative change in group median = (static PPD / PD - 1) x 100%; these are not medians of per-pair percentage changes.
Source: matched-second-turn-comparison.json. Identical Turn 2 payloads only. Single run; no confidence interval or significance claim.
